Dear Readers,

Season's Best to You and Your Loved Ones!

We are pleased to present the first issue of AMJ for 2025, featuring a rich selection of original research papers, case studies, and review articles. This edition highlights the valuable contributions made throughout the year.

We deeply appreciate our readers' continued support and commitment to AMJ. Maintaining a rigorous review process and upholding high-quality standards remain our top priorities. A special thanks to the AMJ editorial team for their hard work in reviewing manuscripts, managing publications, and offering timely feedback to authors.

Our sincere gratitude goes to our editorial board for their unwavering support since the journal's inception, and to our dedicated peer reviewers, whose contributions ensure the scientific integrity and excellence of each article.

AMJ was founded to assist early-career researchers, especially from developing countries, in navigating the academic publishing process. We remain dedicated to this mission while celebrating submissions from esteemed researchers worldwide, including Tunisia, Saudi Arabia, and India.

We invite you to join our reviewer team, submit your research, or recommend colleagues. For inquiries, please contact the AMJ editorial team.

For any questions, please contact the AMJ editorial team.

Sincerely,

**Rick Steves**
